## EXPERIENCE

Aaron has an extensive financial and management background in both accounting public practice and commerce. Aaron's clients benefit from the practical application of his financial management skills, receiving advice and solutions to the various matters that may be encountered, ranging from high level to day to day issues.

Aaron's work in the consulting environment has driven his attitude to excellence and his understanding of the importance of providing an exceptional final product to his clients, enabling the maximum benefit to be derived. Aaron's philosophy is that there should be no surprises, his advice includes planning and consideration to future impacts and outcomes.

Aaron's professional interests and strengths are in providing commercial advice to clients that facilitates informed decision making. In particular, Aaron has provided advice in the areas of valuations, business structures, management reporting, budgeting, cash flow and other financial modelling.

Aaron has prepared and presented technical seminars for various professional organisations.

Aaron has also developed relationships with others to assist when such business matters arise, including with debt and equity financiers and arrangers, and corporate and commercial lawyers.
